

Thank you for expressing interest in UniverCell's global calling card service.

There are two services for you to choose from:

CALLING CARD SERVICES

Pre-paid: This service is perfect for you if you are only calling abroad occasionally and do not mind the responsibility of having to top up your account. The extremely cheap rates are an added bonus!

The costs for the pre-paid service are ½ p per minute to Israel landlines, and 2 ½ p per min to Israeli mobiles. Billed by the minute, you will need to register your mobile number with us in order to activate this service. Once this is done, we will provide you the UniverCell access number to make it work.

Post- paid: You will enjoy this service if you do not want the hassle of topping up your account, and plan to call abroad regularly.

You will be charged at your current rates to your various destinations, which you dial at the moment from your landline. Billed by the second, with no connection fees or minimum call charges, this has the obvious benefit of not having to remember to continuously top up your account. We will then add this service to your existing account, and bill you at the end of the month. Let us know how many numbers you wish to activate, we will again provide you with your post- paid access number.

If you have any further questions, or would like us to set you up with an account, then please do not hesitate to contact Talia at talia@univercell.tel or 0871 950 6004, and she will be very happy to assist you in activating your new account.
